

- **Parish education**

Our parish pedagogues initiate and coordinate learning processes in the parishes, deaneries and the church institutions. They work in various fields in groups of all generations and professions with the support of volunteers.

The commitment for a fair society and advocacy for the disadvantaged is an essential component of their professional self-conception.

A focus on the link between life, faith and learning is included in the elementary theology, pastoral and advisory activities and in the management tasks in consideration to all age groups.
